

Macola 10
Personalized Workspaces
Improve the Way Users
Interact with the Business Via
Role-Specific Views

Benefits of Personalized Workspaces:

- Consolidate role-specific functions into a single workspace for easier navigation
- Reduce time to perform tasks by having critical functions at users' finger tips
- Access web-based workspaces via work or home PCs, tablets and smartphones
- Interpret multiple points of information quickly, all from a single screen in a graphical format
- By bringing key role-specific functionality together, we enable a more natural ERP experience for your users

Personalized workspaces are collections of Macola 10 functionality that are role-specific. You can take a role like “Executive” and bring together graphs and charts showing key performance indicators, provide access and views into financials, upcoming sales opportunities, inventory levels, and more into a single view or workspace. Personalized workspaces are web-based and accessible via work and home PCs, tablets, and smartphones, ensuring you and your employees are always connected. It has long been said that a picture is worth a thousand words – and that is the real power of personalized

workspaces. The visual representation of your data gives you the power to interpret multiple points of information quickly, all from a single screen. With personalized workspaces, you’ll always have the right information at the right time – giving you the data and confidence to make solid business decisions. Workspaces use smart, contextual menus – offering users options and data that are contextually significant. This means it shows the right menus at the right times and enables you to dive deeper or take action – directly from the workspace.

Here are a couple examples of Personalized Workspaces. Most fields within workspaces allow you to click and drill deeper on how and where that data was compiled. Personalized Workspaces allow users to start and end their work day within a workspace, enabling them to be more productive by having key job-based functions at their finger tips and shielding them from functionality that is not pertinent to their job role.

Executive Workspace KPI Performance

Inside Sales Management Understanding Sales Performance

Macola 10 includes 40 pre-configured workspaces which can be geared towards specific areas such as:

- Executive
- Finance
- Inventory
- Manufacturing
- Purchasing
- Sales

Macola 10 workspaces are fully configurable to address your unique business processes and requirements. Context driven menus, functions, dashboards and reports are configurable and modular, simplifying day-to-day tasks and processes for each job function. Workspaces can be built from the ground up, or modified from a template. Use templates to configure roles, reports and field-based menus to take relevant actions on information that is important to you.

About Macola

Macola is ERP and business software that manufacturers and distributors use to automate, manage and grow their businesses. The software empowers companies to take control of cost and complexity at every critical stage from design through delivery and see all facets of their business from a single application.

Macola is an Exact product. Exact builds business software for SMEs and their accountants. Our innovative technology is aimed at specific business needs, providing an overview of today and insights into the opportunities of tomorrow. Exact inspires businesses to grow. Our 1,600 employees love, share and support our customers' ambition. Like them, we aim high. Like them, we aspire to lead the way. That's how we know it's a bumpy road to success. And that's why we build software to help smooth it out, enabling our customers from all over the world to grow.

Macola. ERP and business software.
